

55-Gallon Drum with Plastic Lever-Lock SKU: 1255-YE

CLOSURE INSTRUCTIONS

SHIPPER MUST READ AND UNDERSTAND THESE INSTRUCTIONS

IT IS THE SHIPPERS RESPONSIBILITY PER FEDERAL AND INTERNATIONAL REGULATIONS TO PACKAGE AND SHIP THIS PRODUCT IN ACCORDANCE WITH THESE INSTRUCTIONS.

Contact ENPAC prior to shipping with questions regarding closure, packaging or use of this product.

No free liquids are to be transported. These drums have been qualified in accordance with 49CFR173.3(c) to ship solids.

For the drum described above, an HDPE Lid is applied, and then an HDPE Lever Lock ring is applied, closed and sealed with a twist tie or similar device.

If an inner liner bag is used it must be sealed with a twist tie or similar device prior to the lid and ring being applied.

1. Place the lid on top of the drum, pressing down to ensure it's secured.
2. Apply the ring around the drum and lid.
3. Position the ring by starting on one side and walking around completely until the ring is in place.
4. Tighten the lever-lock and check that the lid and ring are in place.
5. Close the lever-lock to secure the drum.

Note: Drum can be sealed with a lock or twist tie (not included).
