

## Storm Sentinel® Curb Basin Insert

SKU: 4320-CURB

### Installation:

1. Remove catch basin grate.
2. Remove dirt and debris from grate and basin edges.
3. Position the filter coil against the curb inlet. The edges of the coil should extend beyond the opening on both sides.
4. Insert catch basin filter into drain.
5. Reinstall grate. To ensure maximum effectiveness, fabric of filter should be fully captured between grate and edge of basin.
6. Check that there are no gaps between the filter coil and ground.
7. If desired, use a utility knife to cut excess fabric around the grate.

### Removal:

1. Lift one end of catch basin grate while keeping the other side on ground. This keeps the storm drain filter from falling into hole.
2. Secure the storm drain filter by holding yellow handles. The catch basin grate can now be fully removed from the storm drain filter.
3. Lift and remove storm drain filter using yellow handles.
4. Dispose of contaminated Storm Sentinels® according to all local, state and federal regulations. Contact your local disposal authority for more information.
5. Replace and install new filter.
