

## Drop Ceiling Leak Diverter Instructions

### You may need:

- 1. Drain Hose** - Drain hoses are available for purchase separately by ENPAC. Sizes are 10' (SKU: 46-HOSE-10) and 25' (SKU: 46-HOSE-25). Garden hoses (0.75 in. GHT hose fitting) could also be used with this item.

### Installation:

Note: The drop ceiling leak diverter will replace the drop ceiling tile and diverts the leak to a contained area.

1. Remove the ceiling tile.
2. Place the leak diverter into the drop ceiling. The rigid perimeter of the drop ceiling leak diverter will be positioned on the framework of the drop ceiling. (Fig. 1)
3. Attach a hose to drain any leaks (Fig. 2). If the leak is intermittent, the drain cap may be used.
