

# THE POLY-RACK™ SYSTEM

## THE MOST EFFICIENT DISPENSING & STORAGE SYSTEM YOU CAN BUY!

### POLY-RACKER™

Featured as the base of the Poly-Rack™ System, the unique one-piece Poly-Racker™ securely holds two (2) 55-gallon drums with a large, 102-gallon spill capacity. The deep dispensing well easily holds 5-gallon pails while containing incidental spills and splashes in a ribbed bottom without contaminating the sump. Dispensing wells have scalloped edges so pails can be easily removed. Poly-Racker™ can be transported by forklift and contains two (2) standard drain plugs.

### POLY-STACKER™

Combine Poly-Stacker™ and Poly-Racker™ to stack up to (4) drums.

Each Poly-Stacker™ holds two (2) 55-gallon drums and can easily be stacked with a forklift. Any spills from the second level fall into the dispensing well for containment and easy clean-up. When combined, Poly-Racker™ and Poly-Stacker™ create the most efficient drum storage and dispensing system available.

### POLY-SHELF™

Save money while preventing drips and spills! Increase safety and efficiency when Poly-Shelf™ is added to the Poly-Rack™ System. Easily attaches to Poly-Stacker™ and allows simultaneous dispensing from all drums. A drain hole in the bottom diverts liquids into the Poly-Racker's dispensing well.
