

Diverter Berm Wall Butt – 2”H
SKU# 48-2WALL-DB

As the name suggests, the primary function of the diverter berm is just that; diversion. Divert spilled liquids away from walkways and drains or capture them in a designated area. Perfect for applications where machinery and/or equipment are stationary and cannot be moved, but containment is still required. Additionally, containment areas can be created using normal workspace. Use the ENPAC Diverter Berm and avoid costly fines from regularly leaking equipment and meet EPA, OSHA, and SPCC regulations.

- Easy to install and remove
- Durable and resistant 22 oz. PVC
- Open-cell, recycled foam is soft and durable
- Customizable to your exact area
