

## Off-Road Dripillow – 48"x60"

SKU# 5693-YE

Dripillow Berms are engineered to be the ideal portable, outdoor drip and leak protection. They feature absorbent pads sewn into a UV resistant mesh for protection from the elements. These pads are placed inside a tough, industrial fabric shell to prevent excessive spills from reaching the ground. Welded in sandbags prevent the product from flipping over due to the wind, and the retrieval strap doubles as a cinch when folded for convenience and portability.

- No flipping or splashing
- Folds for easy carrying
- Replacement pads available
- Additional sizes and colors available upon request
- Off-Road - Corner grommets and an additional weighted base allow for easy staking and added peace of mind in high-wind and rugged terrain applications.

Technical Data	
<b>Dimensions</b>	48"x60" (122x152)
