

Poly-Racker
SKU# 6000-YE

The Poly-Rack system is the perfect containment solution for dispensing applications from 55-gallon drums. The Racker component of the system features a fully enclosed, compliant sump that allows it to be moved after a spill has occurred. Nothing is more convenient for horizontal dispensing and containment than the Racker-Stacker systems.

- Durable, chemically resistant design
- Holds two 55-gallon drums
- Take your Racker to the next level with Poly-Stacker for added storage
- Shelf and Well Liner available for added convenience
- Single Racker option available
